SUMMARY

Senior software engineer with 10+ years of experience building scalable backend systems.
Specialized in Kotlin, distributed systems, and event-driven architectures.
Passionate about developer experience, observability, and mentoring teams.

EXPERIENCE

Senior Software Engineer - Acme Corp (2021 - Present)
- Led the migration of a monolith to event-driven microservices, cutting p99 latency by 40%.
- Designed a multi-tenant billing pipeline processing 5M invoices per day.
- Mentored a team of 6 engineers and drove adoption of Kotlin across the org.
- Introduced SLO-based alerting that reduced on-call noise by 60%.
- Owned the roadmap for the payments platform serving 20 markets.
- Ran load tests before every major release, preventing 3 production incidents.

Software Engineer - Globex (2018 - 2021)
- Built a real-time fraud detection service scoring 10k events per second.
- Reduced database costs by 35% by introducing read replicas and caching.
- Shipped a partner API used by 200+ external integrations.
- Automated load testing, catching regressions before every release.
- Ran quarterly architecture reviews for the backend guild.

Software Engineer - Initech (2016 - 2018)
- Developed inventory management features for a SaaS platform.
- Improved CI pipelines, cutting build times from 25 to 8 minutes.
- Implemented role-based access control across 4 products.
- Collaborated with design to ship an accessible UI component library.

Junior Developer - Umbrella (2014 - 2016)
- Maintained internal reporting tools used by 15 departments.
- Wrote integration tests that raised coverage from 40% to 80%.
- Migrated legacy PHP endpoints to a modern REST API.

PROJECTS

OpenLedger - Double-entry bookkeeping library for Kotlin
- Maintained an OSS library with 2k stars and 40 contributors.
- Published 30+ releases with a fully automated changelog pipeline.

Dashboards-as-Code - Internal observability toolkit
- Lets teams define Grafana dashboards in YAML and review them in PRs.
- Adopted by 12 teams and cut dashboard drift to zero.

DevBox - Reproducible development environments
- Built on Docker Compose with hot reload for 5 services.
- Onboarding time for new engineers dropped from 2 days to 2 hours.

SKILLS

Languages: Kotlin, Java, TypeScript, Python, SQL
Frameworks: Ktor, Spring Boot, React, Next.js

Infrastructure: Kubernetes, Terraform, AWS, GCP
Data: PostgreSQL, Kafka, Redis, Elasticsearch
Observability: Prometheus, Grafana, OpenTelemetry
Practices: TDD, DDD, event sourcing, CI/CD
Tools: Docker, Git, GitHub Actions, Playwright
Other: technical writing, public speaking, mentoring

EDUCATION

MSc Computer Science - State University (2012 - 2014)
- Thesis on consistency models in distributed key-value stores.
BSc Software Engineering - City College (2008 - 2012)
- Graduated cum laude, GPA 3.8/4.0.

CERTIFICATIONS

AWS Certified Solutions Architect - Professional
Kubernetes Certified Application Developer (CKAD)
Google Cloud Professional Data Engineer
Certified Scrum Master (CSM)
Oracle Certified Professional, Java SE 11
Kotlin Developer Certification (JetBrains)

OPEN SOURCE

kotlinx-serialization - Contributor (2019 - Present)
- Added support for custom serial names and binary formats.
ktor - Contributor (2020 - Present)
- Improved WebSocket reconnect behavior and documentation.
kotest - Contributor (2021 - Present)
- Added new matchers and fixed flaky property tests.
awesome-kotlin - Maintainer (2022 - Present)
- Curated 400+ entries and automated link checking.

SPEAKING

"Kafka at Scale: Lessons from 5M Events per Second" - KotlinConf (2023)
"SLOs That Don't Page You at 3am" - DevOpsDays (2022)
"Migrating a Monolith Without Losing Sleep" - DDD Europe (2021)
"Property-Based Testing in Practice" - JBCNConf (2020)
Guest lecturer, Distributed Systems, State University (2019 - Present)

AWARDS

Acme Corp Engineering Excellence Award (2023)
Speaker of the Year, local Kotlin user group (2022)
Top 10 finalist, Global Hackathon for Good (2020)
Employee of the Quarter, Globex (2019)
